History AutoCAD's origins go back to 1985. In the late 1980s, Bill Turner started a small graphic design firm in San Rafael, California. One of his projects was to create a model-driven application for engineering and drafting. The first version of AutoCAD was released in 1989. It was quickly popular and became the most popular drafting program in the world. In the following years, Turner continued to develop the program, and the company name changed to Autodesk. Turner sold the software in 1996 to Autodesk for a reported $300 million.
